

Company	Representatives	Company Description
<b>Up&amp;Charge</b>	Marin Champenois, CEO Anthonis Plais, COO Guy Flaquière, CTO	UP&CHARGE developed a hands-free automatic charging system for all electric vehicles (cars, trucks, drone cabs, etc.) The solution is interoperable and can be adapted to any used or new electric vehicle. It can be deployed everywhere with a plug-and-play product for companies/individuals and a product for the public sector (invisible system integrated in the ground). It is more efficient than cable charging and reduces the energy bill by 6% to 28% per vehicle per year.
<b>Umay</b>	François Morival, CEO Pauline Vanderquand, Co-Founder	UMAY is a mobile application that helps create safer and more inclusive cities by tackling street harassment and insecurity. It offers real-time alerts, a network of safe places and support for victims.
<b>Heuristech</b>	Tristan de Hervins, CEO	Heuristech detects, locates with precision, characterizes and classifies corrosion defects on buried pipelines using a revolutionary technology called Differential Reflectometry Mapping (DRM).
<b>Bric à Vrac</b>	Elise Rey du Boissieu, President	BRIC A VRAC helps to eliminate unnecessary packaging in everyday life by improving the "loose sales" experience. Thanks to a range of automatic and connected machines, retailers have a simplified solution to sell "loose product" (without packaging) of all kinds, such as nuts, beans, flour, pasta, etc.
<b>Arkady</b>	Paul Taslé d'Héliand, President	Arkady is a digital double of the earth updated in real time thanks to the hybridization of open source or proprietary, terrestrial and satellite data. It is the first data management solution for forecasting and managing operational risk through an immersive 3D interface.
<b>Reyouzz</b>	Romain Deffrenne, President François Losson, CEO	Reyouzz has invented a collection terminal connected and made from upcycled materials, which allows you to recycle a product, safely and without damaging it, against a voucher or a repurchase of the product.
<b>Touch2See</b>	Arthur Chazelle, CEO Alexandre Bediguian, Comms Director	The goal of Touch2See is to make sporting events accessible to blind and visually impaired people with our revolutionary touch pad and automatic audio description solution.
<b>Fair Vision</b>	Jean-Michel Felderhoff, CEO Louis Loonis, Project Manager	FAIR VISION is an SportTech that develops innovative technological solutions to simply and massively connect the world's sports arenas to their ecosystem (players, families, fans etc...).
